📍 : Polokwane, Limpopo

PROFESSIONAL SUMMARY

A dedicated junior Software Engineer with expertise in Python, C#, .NET, JavaScript, and SQL, currently pursuing a master's in computer science. Proficient in designing and implementing innovative software solutions aligned with Agile methodologies. Accomplished researcher recognized for award-winning work on Speech Emotion Recognition using RNN-LSTM techniques. Committed to leveraging technical expertise and problem-solving skills to deliver high-quality applications and contribute to team success.

KEY SKILLS

- **Programming Languages:** Python, Java, C#, C++
- **Web Development:** HTML, CSS, JavaScript
- **Tools & Technologies:** .NET, Git, Jenkins, Gradle, Maven
- **Database Management:** SQL, MySQL, PostgreSQL
- **Software Development Practices:** Agile Development, Scrum Framework
- **AI & Machine Learning:** RNNs, LSTMs, NLP
- **Technical Competencies:** ETL pipelines, Statistical Modelling, Business Intelligence Solutions
- **Soft Skills:** Communication, teamwork, problem-solving, adaptability

EDUCATION

- **Master of Science in Computer Science**
University of Limpopo | Jan 2024 - Present
- **Bachelor of Science Honours in Computer Science**
University of Limpopo | Jan 2023- Dec 2023
- **Bachelor of Science in Mathematical Sciences**
University of Limpopo | Jan 2019 – June 2022

CERTIFICATIONS

- **NEMISA NPC:** Digital literacy made easy | introduction to digital literacy, Microsoft office & emerging technologies | 2025
- **IBM:** Introduction to Clouds, Introduction to Containers, Kubernetes, and OpenShift | 2022
- **NEMISA NPC:** Mobile Digital Literacy | 2022
- **Intel:** Intro to Computers | 2021

PROJECTS & RESEARCH

Postgraduate Research Day Award

- Secured 1st place in 2024 for research on Speech Emotion Recognition using RNN-LSTM techniques, showcasing innovative data modelling approaches.

Interactive Data Visualization

- Created dynamic dashboards using Python libraries (Matplotlib, Seaborn) to analyse large datasets and present findings effectively.

Chatbot Development

- Developed a Python-based chatbot leveraging Natural Language Processing, achieving a 30% improvement in conversational accuracy.

Business Intelligence Project

- Designed ETL pipelines to process and analyse datasets using MySQL and Pentaho, delivering actionable insights that enhanced decision-making processes.

AWARDS & ACHIEVEMENTS

- **1st Place** | University of Limpopo Postgraduate Research Day (2024)
