📍 : Polokwane, Limpopo

PROFESSIONAL SUMMARY

A junior Software Engineer with expertise in Python, C++, C#, .NET, JavaScript, and SQL. Currently pursuing a master's in computer science, with a focus on machine learning and AI, particularly Speech Emotion Recognition (SER) using RNN-LSTM techniques. Experienced in full-stack development, database management, and Agile practices. Recognized for award-winning research and passionate about creating impactful solutions through practical and theoretical knowledge. Committed to delivering high-quality applications and contributing to team success.

KEY SKILLS

- **Programming Languages:** Python, Java, C#, C++
- **Web Development:** HTML, CSS, JavaScript
- **AI & Machine Learning:** RNNs, LSTMs, NLP
- **Tools & Technologies:** .NET, Git, Jenkins, Gradle, Maven
- **Database Management:** SQL, MySQL, PostgreSQL
- **Software Development Practices:** Agile Development, Scrum Framework
- **Technical Competencies:** ETL pipelines, Statistical Modelling, Business Intelligence Solutions
- **Soft Skills:** Communication, teamwork, problem-solving, adaptability

EDUCATION

- **Master of Science in Computer Science**
University of Limpopo | Jan 2024 - Present
- **Bachelor of Science Honours in Computer Science**
University of Limpopo | Jan 2023- Dec 2023

- **Bachelor of Science in Mathematical Sciences**

University of Limpopo | *Jan 2019 – June 2022*

CERTIFICATIONS

- **NEMISA NPC:** Digital literacy made easy | introduction to digital literacy, Microsoft office & emerging technologies | 2025
- **IBM:** Introduction to Clouds, Introduction to Containers, Kubernetes, and OpenShift | 2022
- **NEMISA NPC:** Mobile Digital Literacy | 2022
- **Intel:** Intro to Computers | 2021

RESEARCH

Postgraduate Research Day Award

- Secured 1st place in 2024 for research on Speech Emotion Recognition using RNN-LSTM techniques, showcasing innovative data modelling approaches.

PROJECTS

Personal portfolio

- Developed a personal portfolio website hosted on GitHub Pages using HTML, CSS, and GitHub Pages for hosting and version control. Organized assets and images into structured folders for clean file management.

To-do list app

- Created a simple to-do list app using HTML, CSS, and JavaScript. Implemented features to add, remove, and mark tasks as completed, with local storage for saving data.

Console-based to-do list

- Developed using C++. Users can add, mark tasks complete, and view current tasks.

File encryption / decryption

- Designed a program in C++ to encrypt and decrypt text files using algorithms like Caesar cipher

Student grade book

- Created a C++ program for managing student grades. Features include adding students, grades, displaying grades, calculating averages, and saving/loading data, using SQL for database management.

Exploratory Data Analysis (EDA) on a Public Dataset

- Cleaned a publicly available dataset (e.g., Iris, Titanic, or Kaggle datasets), handled missing values, and performed basic statistical analysis. Visualized data distributions, correlations, and key patterns using Python (Pandas, Matplotlib, Seaborn) in Jupyter Notebook.

Linear Regression on Housing Prices

- Used a housing prices dataset (e.g., Boston Housing dataset) for data preprocessing, feature selection, and normalization. Built a linear regression model to predict house prices based on features like the number of rooms, square footage, etc

Banking System

- implemented classes for BankAccount and Customer. Features include creating new accounts, depositing and withdrawing money, checking balances, and basic error handling.

Library management

- Developed a library management system to track books, users, and borrow history.

AWARDS & ACHIEVEMENTS

- **1st Place** | University of Limpopo Postgraduate Research Day (2024)
